EDUCATION

Vishwakarma Institute Of Information Technology — Pune, India
Bachelor of Technology - Computer Engineering — July 2024 – June 2027
Relevant Courses: OOPS, Operating Systems, Computer Networks, Big Data, AI, Cloud Computing

Government Polytechnic Pune — Pune, India
Diploma - Computer Engineering — Aug. 2021 – June 2024
Relevant Courses: Data Structures, Algorithms, Application Security, DBMS, OOPS, OS, Networking

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, SQL
Cloud Technologies: AWS EC2, AWS S3, CI/CD
Frameworks & Tools: React, Node.js, Git
AI/ML: Machine Learning Fundamentals, NumPy, Pandas

EXPERIENCE

Virtusky IT Pvt Ltd — Pune, India
Full Stack Java Developer Intern — July 2023 – August 2023

- Developed an enterprise-level application using Advanced Java and JDBC, ensuring seamless backend integration with databases.
- Worked in an Agile development team, collaborated with developers and testers, and used Git for version control to manage code efficiently.
- Implemented JUnit test cases to validate application logic and ensure high reliability of the system.

PROJECTS

Digital India: E-Health Card — Java, Python, Firebase, Android

- Developed a QR-based health records system using Java and Android, allowing patients and healthcare providers to securely store and access medical data.
- Implemented a machine learning-based disease prediction system in Python, analyzing patient history and medical records for early health risk assessments.
- Integrated Firebase authentication and encryption techniques to ensure secure real-time data storage and retrieval, complying with healthcare regulations.

SmartSketch — Java, JavaFX, AWS, Machine Learning

- Developed an AI-powered criminal identification platform with a JavaFX-based drag-and-drop interface for law enforcement to create facial sketches.
- Implemented deep learning models using Convolutional Neural Networks (CNNs) to match hand-drawn sketches with real images in law enforcement databases.
- Deployed the platform on AWS cloud, utilizing AWS S3 for secure storage, AWS Lambda for real-time image processing, and IAM security policies for secure data handling.

HONORS AND AWARDS

National Hackathon Finalist - AlphaByte 2.0 (March 2025)
Local Award - NASA International Space Apps Challenge Surat (October 2024)
Second Runner-up - Vortexa Hackathon (September 2024)
National Hackathon Finalist - AlphaByte 1.0 (April 2024)
Runner-up - InfoSpark23 Coding Competition (November 2023)

CERTIFICATIONS

Java Certified - HackerRank
Introduction to Machine Learning - Infosys Springboard
